Class Diagram with Aggregation and Association

Class Diagram with Association and Aggregation

User

-userid: String
-password: String

+User(String,String)
+getUserid():String
+setUserid(String):void
+getPassword(String):void
+toString():String

Customer

-id: Integer
-name: String
-address: Address

+Customer(Integer,String,Address)
+getId(): Integer
+setId(Integer):void
+getName():String
+setName(String):void
+getAddress():Address
+setAddress(Address):void
+toString():String

Admin

-id: Integer
-name: String
-address: Address

+Admin(Integer,String,Address)
+getId(): Integer
+setId(Integer):void
+getName():String
+setName(String):void
+getAddress():Address
+setAddress(Address):void
+toString():String

Address

-id:Integer
-address:String
-city:String
-country:String

+Customer(Integer,String,String,String)
+getId(): Integer
+setId(Integer):void
+getAddress():String
+setAddress(String):void
+getCity():String
+setCity(String):void
+getCountry():String
+setCountry(String):void
+toString():String
